

One life.....One earth. Make it count.
BE PART OF THE SOLUTION.

I am contacting you to inform you of my product for your fundraising projects. I have a very re-usable, durable, recyclable bag that is great for grocery shopping or any other shopping. Everyone needs groceries and we need to work together to eliminate the plastic bags for the sake of the environment. The bags are made of non-woven polypropylene materials, are heavy duty, have a removable base in the bottom and are washable.

The bag, which has the above environmentally aware “eco-fashionable” logo, would provide families with a usable product that is in a very reasonable price range that could be taken into any and every store that they shop in.

This is going to be a practice of the near future as many states will follow California’s lead in banning plastic bags to conserve and preserve. It takes nearly 1,000 years for the plastic bags to break down in the landfills. They are also clogging the waterways, harming wildlife and of course, littering the land. It takes millions of barrels of oil to produce plastic bags.

These reusable bags would be a great educational tool for kids today to be a part of an environmental solution while earning funds for their classrooms or organizations. Your school or organization could earn up to 50% of the profits. Please take a moment of your time to contact me for details for your next fundraiser.

Be Part of the Solution.

Thank you,
Claudia Feeny
